

Alejandro Morales Esquivel

Front-End Developer

Experienced self-taught Front-End Developer with a strong focus on developing responsive web applications using React. Track record developing high-quality web applications through personal projects. Continuously learning and improving my skills to stay up-to-date with the latest trends in web development. I thrive in a collaborative environment and am excited to bring skills and solutions to an innovative company.

MOST RECENT PERSONAL PROJECTS

Front-End Developer at eShop

May 2022 - Present · 10 months

RESPONSIBILITIES

- Implementation of login functionality to allow users to create an account.
- Design and development of the user interface using React to create reusable and responsive components.
- Creation of a favorite's system to allow users to save products for future purchase.
- Development of the shopping cart with functionalities such as adding or removing products.
- Integrate Redux Toolkit to manage application state more efficiently.
- Develop notification cards to inform the user about the status of an action, e.g. to confirm that a product was successfully added to the shopping cart
- Implement a function that makes product images load only when needed.

Front-End Developer at Subscription Management

Nov 2022 - Jan 2023 · 2 months

RESPONSIBILITIES

- Implementation of login functionality to allow users to create an account.
- Design and development of the user interface using React to create reusable and responsive components.
- Creating filters to sort subscriptions based on paid or pending status, making it easy for users to track their subscription payments.
- Developing the calculation feature to display the total payment for all subscriptions on a monthly, weekly, and annual basis.
- Integrate Redux Toolkit to manage application state more efficiently.

- Developing the drag functionality using React libraries to allow users to move subscription cards to right or left to execute an action like mark the subscription as paid or delete it.
